

ECZEMA'S ITCH IS TORTURE.

Eczeema is caused by an acid humor in the blood coming in contact with the skin and producing great redness and inflammation; little pustular eruptions form and discharge a thin, sticky fluid, which dries and scales off; sometimes the skin is hard, dry and fissured. Eczeema in any form is a tormenting, stubborn disease, and the itching and burning at times are almost unbearable; the acid burning humor seems to ooze out and set the skin on fire. Salves, washes nor other external applications do any real good, for as long as the poison remains in the blood it will keep the skin irritated.

BAD FORM OF TETTER.

"For three years I had Tetters on my hands, which caused them to swell twice their natural size. Part of the time the disease was in the form of running sores, very painful, and causing me much discomfort. Four doctors said the Tetters had progressed too far to be cured, and they could do nothing for me. I took only three bottles of S. S. S. and was completely cured. This was fifteen years ago, and I have never since seen any sign of my old trouble."—Mrs. L. B. Jackson, 144 McGee St., Kansas City, Mo.

S. S. S. neutralizes this acid poison, cools the blood and restores it to a healthy, natural state, and the rough, unhealthy skin becomes soft, smooth and clear.

SSS cures Tetters, Erysipelas, Psoriasis, Salt Rheum and all skin diseases due to a poisoned condition of the blood. Send for our book and write us about your case. Our physicians have made these diseases a life study, and can help you by their advice; we make no charge for this service. All correspondence is conducted in strictest confidence.

THE SWIFT SPECIFIC CO., ATLANTA, GA.

The merited reputation for curing piles, sores and skin disease acquired by DeWitt's Witch Hazel Salve, has led to the making of worthless counterfeits. Be sure to get only DeWitt's Salve. W. T. Brooks.

To Cure a Cough

stop coughing as it irritates the lungs, and gives them no chance to heal. Foley's Honey and Tar cures without causing a strain in throwing off the phlegm like common cough expectorants. Clark & Kenney.

The most soothing, healing and anti-septic application ever devised is DeWitt's Little Early Riser Salve. It relieves at once and cures piles, sores, eczema and skin diseases. Beware of imitations. W. T. Brooks.

Mrs. Frances L. Sales of Missouri Valley, Ia., writes: "I had severe kidney trouble for years, had tried five doctors without benefit, but three bottles of Foley's Kidney Cure cured me. Clark & Kenney."

Quality and not quantity makes DeWitt's Little Early Riser such valuable little liver pills. W. T. Brooks.

A Prominent Lawyer.

Of Greenville, Ill. Mr. C. E. Cook, writes: "I have been troubled with biliousness, sick headache, constipation, etc., for several years. I sought and tried many remedies, but was disappointed until I tried your Syrup Pepsin. I can cheerfully recommend it to any suffering from above complaints." G. S. Varden & Co.

Each little pill as DeWitt's Little Early Riser are very easily taken, and they are wonderfully effective in cleansing the liver and bowels. W. T. Brooks.

Have You a Cold?

If so then instead of taking so much quinine take a pleasant and mild stomach and bowel remedy which will cleanse the system, and you will be surprised how quickly the cold will leave you. We sell Dr. Caldwell's Syrup Pepsin for just this purpose. Try it, 10c. 5¢ a bottle. Sent by G. S. Varden & Co.

PERSONS who have had portraits made will please call and get same at my gallery. L. GRINMAN.

When threatened by pneumonia or other lung trouble, prompt relief is necessary, as it is dangerous to delay. We would suggest that One Minute Cough Cure be taken as soon as indications of having taken cold are noticed. It cures quickly and its early use prevents consumption. W. T. Brooks.

Persons who suffer from indigestion can not expect to live long because they cannot eat the foods required to nourish the body and the products of the undigested foods they do eat poison the blood. It is important to cure indigestion as soon as possible, and the best method of doing this is to use the preparation known as Kodol Dyspepsia Cure. It digests what you eat and restores all of the digestive organs to perfect health. W. T. Brooks.

FOR RENT.—One or two furnished rooms. Apply at The News office.

You will not be tortured by the dentist if you use Antiseptalcine.

This season there is a large death rate among children from croup and lung trouble. Prompt action will save the little ones from these terrible diseases. We know of nothing so certain to give instant relief as One Minute Cough Cure. It can also be relied upon in grippe and all throat and lung trouble of adults. Pleasant to take. W. T. Brooks.

Save doctors' bills by giving Foley's Honey and Tar to infants and children in time to prevent pneumonia or croup, which are fatal to so many thousands of babies. Clark & Kenney.

Chapped hands, cracked lips and roughness of the skin cured quickly by Banner Salve, the most healing ointment in the world. Clark & Kenney.

The Irish Hedge School.

The educational structure for which, taking advantage of the toleration of government, the hedge schoolmaster abandoned his al fresco establishment, was a very humble one of its kind. The peasantry, animated by the strong Irish love of learning, built it for him, just as in modern days they assemble and build huts for evicted tenants.

It was not a very formidable undertaking. A deep, dry ditch or trench by the roadside was usually selected for the site. At the side of the trench an excavation of the requisite area was dug, so that the clay bank formed three sides of the inclosure. This saved the trouble of building walls. Then the fourth side, or front side wall, with a door and two windows, was built of green sods laid in courses, while similar sods raised the back to the required height and pointed the gable ends.

Young trees and wattles cut from the nearest wood and bound together with straw ropes and withes formed the roof timbers. Over these were spread brambles, then came a layer of "scraws," or slabs of healthy bog surface, and over all a thatching of rushes. The earthen floor was pared to an approach to a level, the rubbish cleared away, and a pathway made to the public road. There was your hedge school-house, ready for business.—Donahoe's Magazine.

It Killed the Bear.

A man who had experience in Alaska was listening to a group of citizens discussing the weather and broke in on the talk thus:

"Pshaw, you fellows don't know what changeable weather is. You think it's always cold in Alaska, do you? Well, just let me tell you a little personal experience of mine. One day I went hunting with a party of miners. The weather was quite warm when we started, and I perspired freely. Suddenly it turned bitterly cold, and large icicles formed on my whiskers (I had grown a full beard). Crossing a small canyon, I came face to face with a big, ugly looking bear. I had nothing but powder in my gun, and the man with the cartridges was away behind me, so as a desperate resort I rammed the icicles from my beard into the gun and blazed away."

"And what happened?" said one of the crowd eagerly.

"Why, I struck him squarely in the head and killed him."

"Killed him? Impossible!" chorused the crowd.

"But it did, I tell you. The temperature suddenly turned warm again, melting the icicles, and the bear died from water on the brain."—Detroit Free Press.

Dangerous Factories.

Not far from the heart of New York city is a factory for the manufacture of deadly poisons in quantities large enough to annihilate the entire population of New York. The factory is so guarded that even its next door neighbors need have no fear of it, but the possibilities stored there excite the imagination. No one may enter it without a special permit. The employees are all skilled men, well aware of the danger of the slightest carelessness. They manufacture, among other things, pure anhydrous acid, which is so dangerous that in its pure state it is not placed in the market. There is instant death in its fumes if they are permitted to escape. Nitric acid is stored in another part of the factory in big glass carboys. The men who work in this factory realize that a broken carboy of nitric acid would mean a disaster, and they treat it with the respect which it deserves. This factory and others like it are guarded more carefully than a safety deposit vault.—New York Sun.

When Bathing Was Rare.

In some old court memoirs of the eighteenth century which have recently been called again to attention it is stated that when George IV was a baby he was bathed only once a fortnight. That was thought to be plenty often enough in those days for a child to be washed. When one of George's little sisters had measles, the royal mother gave most careful instructions that the child's linen was not to be changed too soon, as she feared that some careless attendant would clothe it in garments insufficiently aired and so "drive in the rash." In those days people were much afraid of clean linen and bathing. It was believed the complete bodily ablutions were weakening, yet prince, peer and peasant alike called in at every ailment the doctors of the period, who bled them into a state of weakness and sometimes death.

And Still She Wept.

Toto was crying. "What's the matter?" asked one of her father's friends. "I've lost my 2 cents!" she wailed. "Well, never mind. Here are 2 cents," said the friend. Soon Toto was crying harder than ever. "What's the matter now?" she was asked. "I'm crying because if I hadn't lost my 2 cents I'd had 4 now!" was her reply.—Detroit Free Press.

His Bump.

"This," said the eminent phrenologist, "is the bump of intelligence, and"—

"Heah, boss, quit pinchin dat bump so spordifically," protested Unc' Ebene. "My haid ain't felt good sence de ole woman rapped me dar wid a rollin pin, an yo' bet I've got more 'telligence in dat bump dan ter get in 'er way ergin."—Denver Times.

The Japanese language is said to contain 60,000 words. It is quite impossible for one man to learn the entire language, and a well educated Japanese is familiar with only 10,000 words.

Ceremony was invented by a wise man to keep fools at a distance.—Chicago News

Bird Intelligence.

During a high wind one summer day a young oriole was thrown from its nest to the ground. It was picked up by kind hands and kept in the house till the storm was over and then placed on the roof of the piazza. A watch was kept behind the closed blinds of a window near by to note proceedings on the part of the parent birds. They in the meantime had seen the little one borne away and had followed it to the house, and, as it was kept near the open window, its cries had apprised them of its whereabouts. They soon came to it on the roof and hovered about it, doing much talking and consulting together.

Finally they alighted near the little one, and the female slipped her wing under it and seemed to urge some course of action upon the male, who fidgeted about coming to the little one, spreading his wings over it, then flying to a tree, when the female followed him and brought him back and again slipped a wing under the little one.

Finally he seemed to understand or to get his nerve under control, and, slipping his own wing under, together they made a sort of cradle for the birdling, and, each flapping its free wing, they flew to the tree, bearing it to a place of safety among the branches, where it was lost sight of.—Boston Christian Register.

Treatment For Sprains.

The prevalence of sprains and strains owing to the indulgence in athletic exercises of all kinds moves an authority on the treatment of these painful accidents to say:

A little common sense treatment is often all that is needed when the strain is at ankle or wrist and without complications. It will swell very alarmingly at first and gradually develop a frightful looking bruise, but from the first it should have complete rest and a treatment of hot and cold douches, the hot being used at first, when the swelling is painful, and the cold later on, as a sort of tonic to the relaxed muscles. The hot must be very hot and the cold very cold, as the tepid water does harm rather than good.

For the first day of a strain, when all the wrenched cartilages and muscles are aching, great relief is found in a poultice of egg and salt. To make it, beat the white of an egg till light, but not stiff. Stir in gradually a cup and a half of salt, or more if needed, to make a thick, pasty like icing. Spread this on a cloth and bandage in place. Cover all with oil silk or a thick bath towel to protect the sheets, since the egg leaks out continually. After this has relieved the soreness begin with hot water fomentations and wear a light, firm bandage, except at night.

A Fine Distinction.

A young down town drug clerk who had heard the story of the colored woman who had asked for flesh colored court plaster and was given black by the observant dealer stored the incident away in his mental dust box and decided to use it at the first opportunity. He had not long to wait, for a few nights ago a comely colored girl stepped into the store where he was employed. "Ah wants some court plaster," she said.

"What color?" inquired the clerk, with affected nonchalance.

"Flesh cullah, sah."

Trembling in his shoes and keeping within easy reach of a heavy pestle, the clerk handed the woman a box of black court plaster, and he was surprised at the time that the situation afforded so little humor. The woman opened the box with a deliberation that was ominous, but she was unruffled when she noted the color of the contents.

"Ah guess yo' mus' a-misunderstood mah ordah. Ah asked foh flesh cullah, and yo' done give me skin cullah."

The drug clerk is still a little dazed from the encounter, and he has firmly resolved to subject every joke to rigid laboratory test hereafter before using.—Pittsburg News.

His Dim Idea.

A teacher was giving her class an exercise in spelling and defining words. "Thomas," she said to a curly haired little boy, "spell 'hex.'"

"I-b-e-x."

"Correct. Define it." "An 'hex,' answered Thomas after a prolonged mental struggle, "is where you look in the back part of the book when you want to find anything that's printed in the front part of the book."

Unforgiven.

At a recent banquet in Sydney a descendant of the Macdonalds massacred at Glencoe passed a knife "with the blade foremost" to a member of a famous old family bearing the historic name of the Macdonalds' betrayers. Most of those who looked on stigmatized the action as one of contemptibly bad breeding. But one or two understood the significance and knew that the betrayal is still unforgiven.

Musings by the Seashore.

"What a mistake it is," observed the doctor as they walked along the shore, to speak of this as the watery waste! There isn't a drop that is wasted. Without the ocean the continents themselves would soon become uninhabited deserts."

"Therefore," commented the professor, "while it laves the sand it saves the land."—Chicago Tribune.

Pyromaniac.

Fond Father—That is the smartest child I ever saw. If any one can set a river on fire, he will when he grows up. Fond Mother—Indeed he will, bless his little heart! Only this morning I found him starting a fire under the piano.—Philadelphia Call

The resting place of Daniel Boone is in the heart of one of London's quietest quarters, about a quarter of a mile from the Bank of England.

Help... Nature

Babies and children need proper food, rarely ever medicine. If they do not thrive on their food something is wrong. They need a little help to get their digestive machinery working properly.

SCOTT'S EMULSION
OF
COD LIVER OIL
WITH HYPOPHOSPHITES OF LIME & SODA

will generally correct this difficulty.

If you will put from one-fourth to half a teaspoonful in baby's bottle three or four times a day you will soon see a marked improvement. For larger children, from half to a teaspoonful, according to age, dissolved in their milk, if you so desire, will very soon show its great nourishing power. If the mother's milk does not nourish the baby, she needs the emulsion. It will show an effect at once both upon mother and child.
